Operational Research Methods in Business, Finance and Economics

Papers from 31st European Conference on Operational Research, 11 – 14 July 2021,
Athens

Guest Editors:

Constantin Zopounidis, Liadaki Angeliki, Eskantar Marianna

*Technical University of Crete
Dept. of Production Engineering and Management
Financial Engineering Laboratory
University Campus, 73100 Chania, Greece*

Operational Research (OR), as a multidisciplinary analytical field, contributes in many ways in the design, dissemination, and management of several new technological innovation in business, finance and economics. Among others, these include areas such as big data analytics, green technologies, socially responsible investments, supply chain networks, economic efficient, warehouse management systems, banking management, risk assessment, energy systems, etc.

This volume aims at presenting the latest advances on the contributions of OR approaches in technology-driven areas in business, finance, and economics, covering both theoretical / methodological developments as well as real-world case studies. The volume also welcomes submissions that explore the connections of OR with other analytical disciplines (e.g., soft computing, computer science, etc.), which promote the development of new decision support technologies.

The volume will carry revised and substantially extended versions of selected papers presented at the 31st European Conference on Operational Research (EURO Athens, 2021 Greece).

Notes for Prospective Authors

Deadline for full paper submission: 1st May 2022

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. All submissions will go through the regular double-blind review process.

All papers must be submitted online. To submit a paper, please follow the link: [EquinOCS \(springernature.com\)](https://www.springer.com/equinocs)
